

The night **is** cold, I'm still awake
I hear your voice in every break
I try to move, I try to breathe
But every step still **leads** to me
I say **I'm** fine, but that's not true
My heart still **waits** for you
I'm alone with memories of you right next to me
I'm alone with everything, you said you'd never leave
I'm alone with memories in every empty room
I'm alone with memories, and they all **lead** to you
Your empty side, your empty smile
Feels like **it's been** a little while
I **close** my eyes, I **see** your face
In every crowded empty place
I try to run, I try to hide
But you're still on my mind
I'm alone with memories of you right next to me
I'm alone with everything, you said you'd never leave
I'm alone with memories in every empty room
I'm alone with memories, and they all lead to you
Maybe one day I'll be okay
But tonight **I'm** not that brave
I'm alone with memories
And learning how to breathe
I'm alone with memories
Of who we **used to be**
